

Requirements For CD Rear Insert

- Please supply a digital file.
- For best results provide artwork at a minimum resolution of 300dpi and in CMYK format not RGB.
- Ensure that a 3mm bleed area is added to all artwork.
- Ensure that crop/trim/perforation marks are added to all artwork.
- It is preferable for you to supply us with a photoshop (psd), tiff or pdf file and a colour laser copy/proof of your graphics.
- These same dimensions can be used for the reverse side should you require your rear insert to be double sided.
- The images shown are not to scale!!!
